

PECO ENERGY, AN EXELON COMPANY

Installation of an AMR System and Other
Meter-related Activities

PROJECT DESCRIPTION & SCOPE

PECO initiated a contract with VSI Meter Services, Inc. (now Grid One Solutions, Inc.) in 1994 for manual meter reading services for electric and gas. This contract has transitioned since then to complete a major AMR deployment and continues to include transfer, continuous service and notice work, as well as service termination and restoration work at the taps. During the AMR deployment, more than two million meters were automated in a 30-month period. Cellnet Fixed Network was the technology utilized to support this automation effort.

PROJECT GOALS

The goals of this large-scale complex project are to improve the manner in which PECO gathers meter data and provides billing, as

well as performs outage management, thus improving overall customer satisfaction.

SERVICES PROVIDED BY GRID ONE

- ▶ Reading 1.7 million meters monthly prior to AMR deployment
- ▶ Installing more than two million AMR endpoints
- ▶ Performing all meter services field work including transfers, CE/CS, notice, termination and restoration
- ▶ Dispatching and Call Center activities

PROJECT RESULTS

Grid One continues to meet and/or exceed PECO's expectations as can be evidenced by the productive relationship that has existed continuously between the companies since 1994.
