VSI Meter Services Installs 10-Millionth Metering Endpoint

ASTON, PA — VSI Meter Services (VSI) is pleased to announce that it recently eclipsed a major milestone of installing over 10 million metering endpoints.

"We are very proud of this significant accomplishment," says Ted Fiala, president of VSI, one of the leading Advanced Metering Infrastructure (AMI) deployment contractors in North America. "What makes this achievement even more satisfying is that our project teams performed these installations with safety as the key focus. I thank each of our employees for their

commitment to safety, quality and customer service."

As consumer acceptance of smart grid applications and energy conservation grows, VSI is leveraging its experience and industry knowledge to support demand response initiatives, in-home display installations and smart energy appliance applications.

VSI project teams are comprised of field technicians and call center personnel who work together to complete projects on time and on budget with the highest regard for professional customer service. VSI follows OSHA safety principles and guidelines, as well as Project Management Institute standards.

"From conventional analog meters to the latest smart meters, VSI's successful installation of 10 million electric, gas and water endpoints is a testament to the trust our customers have placed in VSI," commented Fiala. "We will continue to work hard to earn that trust."

About VSI Meter Services, Inc (VSI)

VSI Meter Services, Inc. specializes in AMI deployments for electric, gas and water utilities. In addition to smart grid services for in-home displays and load control devices, VSI performs meter reading, field services for credit and collections, customer call center operations and back office services including secure data transfer and storage. With headquarters in Aston, Pennsylvania, VSI has deployment facilities across the United States and parts of Canada. VSI is part of UtiliCon Solutions, Ltd., a wholly-owned subsidiary of the Asplundh Tree Expert Co., a major supplier of outsourced field services to utilities and municipalities. Asplundh is a privately-held company, founded in 1928, which currently employs over 28,000 people in the U.S., Canada, Australia and New Zealand.
